

The Wagon Wheel OF Fortune

Thank you for downloading the Wagon Wheel of Fortune. No longer will you need to ponder your biscuit selection.

Construction:

Look around you. Can you see some poly board or strong card? You'll need it to mount the print and construct the base. You'll also need an axel to spin the wheel on. A spare screw secured with Blu-tac did the job for us as the wheel will need to rotate freely. Finally attach the WWoF logo over the screw with super glue to hide the unsightly axel. Enjoy!
